

# TCS BRAVE

## Real Truckmount Power Space-Saving Design

The TCS BRAVE is our most compact and affordable cleaning system.

It comes packed with all the things you would expect from a larger truckmount - General TX pump with a clutch, high-pressure 3HT heater, DSL self-lubricating blower from Sutorbilt, plus our exclusive 18HP Briggs & Stratton engine complete with an industrial solenoid and starter.

Real truckmount power is now available in a small package. Plus, the BRAVE operates quietly at full throttle without reducing the CFM performance.

Simple dependability is what our customers have come to expect from the entire line of TCS equipment. We are proud to offer this new machine - always in stock, and ready to install. It is a fitting addition to our WARRIOR and CHIEF series of truckmounts and will fit in almost any size vehicle.

If you're ready to take the next step up from a portable extractor, or lower your fleet cost, the BRAVE from TCS is the right choice. Clean faster, and clean longer with less fuel, less noise, and even more savings!
