

TCS CHIEF II

Dual-Wand Performance High-Powered Cleaning

The CHIEF II is the flagship of the TCS line. Powered by the legendary Kohler 26.5 Command PRO engine, the high-performance blower provides all the flow you need for dual-wand performance.

The additional air flow and water capacity makes the CHIEF II an ideal choice for the serious restoration professional. For cleaning carpet and tile, or extracting water, a dual-wand configuration helps drastically reduce the time it takes to finish large jobs.

Another feature is the 180,000 BTU propane heater that provides sizzle, even with both wands working at the same time.

Chief II Truckmount Options & Upgrades

Installation Options

The CHIEF II is designed to be installed in a 1-ton extended van. With a dry weight of almost 1,100 pounds, it's heavy, but still smaller than other competitive systems on the market. Also, TCS offers the best price & financing options on new Chevrolet vans.

With custom recovery tank and multiple fresh water tank options, the TCS CHIEF II can take up even less space in your vehicle. Electric Reels, stainless filter boxes, and custom mounting brackets are also available. Installation is possible for Nissan, Ford & Dodge vans as well.

TCS can include a custom trailer with your truckmount purchase. Tandem axles, a flat front, and extra height make a TCS trailer an excellent choice for cleaners who already have a pickup truck or just want to save money on their first complete truckmount system.

Box Trucks are great options for companies that need to keep all their tools close at hand. If your box doesn't have a side door, the entire TCS CHIEF system can fit along the side walls. Or TCS can have a side door professionally installed for you which will allow for more floor space.

Package Upgrades

Fresh Water Tank

TCS truckmounts come equipped with 55 gal fresh water tanks. Step up to a Hydro-well and increase your fresh water capacity to 115 gal.

Auto Pump Out Kit

The best APO in the industry. Strong enough to keep up during routine cleaning or intense water extraction. Includes additional ports and plumbing.

Electric Hose Reel

Save space, save time, and lower technician fatigue with an electric vacuum hose reel. Maximum capacity 300 feet.

Rotovac Accessories

360i

Powerwand

360 XL

ROTOVAC

From the original makers of the RX-20, the Rotovac line of light-weight rotary extraction wands offers the most features for residential and commercial cleaning, at the lowest price.

Tile Accessories

Hydroforce Gekko

Mytee Spinner

EDIC Revolution

Hydroforce SX Series

Upgrade your TCS truckmount system to 2000 PSI for hard surface cleaning. Package upgrade includes XP Little Giant heater and Emperor 1813 pump to maintain high heat and maximum pressure.
