

TCS CHIEF II DIESEL

Ultimate Cleaning Machine Simplified Fuel Source

Specially built for Dodge Sprinter vans and diesel box trucks, the CHIEF II DIESEL is the right choice for the serious professional who wants a blazing hot, high-performance, no-compromise truckmount. Like all TCS systems, the CHIEF II DIESEL is designed to last thousands of hours with only routine maintenance. The Kohler diesel engine provides higher torque so you'll have consistent vacuum even with water extraction and other high-demand work. A single fuel source for the vehicle, truckmount and heater adds convenience and simplicity to our biggest truckmount system. The CHIEF II DIESEL maintains the highest temperatures in the industry even during hard surface cleaning and dual-wand operation.

INSTALLATION OPTIONS

The **TCS CHIEF II DIESEL** is the perfect truckmount system for a diesel Sprinter van. There are several options for layout and storage so you can make the most of your cargo space.

The **TCS CHIEF II DIESEL** can be installed in your box truck whether the vehicle runs on diesel fuel or gasoline. We recommend a large side door in the box for the most floor space to be available for other equipment after installation.

Any TCS truckmount can be installed in a trailer, but the **CHIEF II DIESEL** has the most power and the most heat. TCS can provide a custom trailer with tandem axles and a flat front for the best installation.
